 - Emergency Order 28, Notice 1
 - Safety Advisory 2013-06
 - MP&E Technical Bulletin 10-01

Securement Working Group Update

RSAC Task No. 13-03: Securement Requirements: To ensure appropriate processes and procedures are in place to ensure that any unattended trains and vehicles on mainline track or mainline sidings outside of a yard or terminal are properly secured against unintended movement, and as appropriate, such securement is properly confirmed and verified.

RSAC Task No. 13-04: Operational Testing for Securement of Rolling Equipment: To enhance safety by confirming that appropriate processes and procedures are in place to ensure that unattended trains and vehicles on mainline tracks or mainline sidings outside of yards or terminals are properly secured against unintended movement by ensuring that proper operational testing is conducted regarding securement of unattended equipment.

RSAC Task No: 13-03

Securement Requirements

- The decisions reached by the Working Group on RSAC task 13-03 were:
 - AAR will prepare draft Rule Text related to the requirements of EO-28 for presentation to the Working Group at the December 17, 2013, meeting

Securement Working Group Update

Questions?

RSAC Task No.: 13-04

Operational Testing for Securement of Rolling Equipment

- Working group specific task was to review operational testing under Part 217 related to securement and determine if frequency or enhancement of the tests was needed.
- The consensus from the working group was that amendment of the regulations was not necessary. Current testing frequencies and programs are sufficient.

RSAC Task No: 13-04

- AAR is preparing a presentation for the next meeting (December 17th) regarding the training of their testing officers and the implantation of the testing program related to securement.
